Wilbur the Aeronant. THRILLING ACCOUNT OF HIS TERRIBLE

It seemed an age while the man was fall-ing, for before he loosened his grasp the balloon must have been at least a mile from the earth, and what an age to that poor wife who watched her husband ruch-ing toward her and death with the speed of light. When about half a mile from the ground his body ceased its gyratory motion, assumed a perpendicular position and came down head first. It struck the earth some distance from us, and then re bounded, felling again within a few fee of where it struck. Then, from para yzed fear, the crowd broke into shrick of terror, women ran wildly about ecream

of terror, women ran wildly about soreaming and actually tearing their heir, and a rush was made for the spot where the man had struck the ground. There was an indentation not less then eight or ten inches deep, and filled with blood and brains which had burst from the skull when, like a cannon ball let drop from an immense height, it crushed into the earth. The dead man was then taken up and con-The dead man was then taken up and c New York Market riod into the Albert House, where the poor wife, who had often safely traversed the air with her husband, cared for it,

A day or so ago Gasbaroni visited the various remarkable buildings and piazzas of Rome. He was followed by a crowd of "monelli," as the Romans call ragamnifins. He wished to see the Ghetto, and expressed surprise at its fitthines. The poor Jews, to whom the name of Gasbaroni has been a synonim for all that is had, and need to frighten children, were terribly slarmed at his appearance among them. At the Prozza Navona he said: "Non mi place" (I don't like this), and added, with a bratal smile, "there are no as well throw off the mask and arow him-"Non mi place" (I don't like this), and publicans will not be deceived. The building of the Northern Pacific Railroad, (began July last) is being pushed forward with great energy from both extremities of the line. Several thousand men are employed in Minnesota and on the Pacific coast. The grade is nearly completed 266 miles westward from Lake Supernor; trains are running over 130 miles of finished road and tracklaying is rapidly progressing toward the eastern border of Dakota. Including the purchase of the St. Paul & Pacific Road, the Northern Pacific Company now has 4 13 miles of completed road, and by September near this will be increased to at least 5450.

A GOOD INVESTMENT. Jay Cooke & Co. are now selling, and unkesitatingly recommend, as Frostlable and perfectly Safe investment, the First Mortgage Land Grant Gold Bonds of the Northern Pacific Railroad Company. They have 30 years to run, bear Seven and Three Tenths percent, gold interest (more than 5 per cent, currency) and are secured by first and only mortgage on the entire road and its equipments, and also, as fast as the road is sompleted, on 23,000 ACERS OF LAND to every mile of track, or 560 acres for each \$1,000 Bonds. They are exempt from U. S. Tar; Frincipal and Interest are payable in Gold; Denominations: Coupons, \$100 to \$1,000; Registered, \$100 to \$10,00.

LANDS FOR BUNDS. Northern Pacific 1-30s' are at all times receivable at two per cont. above par, in eachangs for the Company's Lands, at their lowest cash price. This renders them practically interest Bearing Land Warrma.

RINKING FUND. The proceeds of all sales of Landse are equipment to the re-purchase and cancellation of the First Mortgage Bonds of the Ompany. The Land Grant of the Boad exceeds Fitty Million Acrea. This inspense Shuting Fund will undoubtedly gashed the principal of the Company's bended debt before it falls due. > FOR OIL WELLS. CATES' PATENT BACK SUSTION PREVENTIVE

Valuable Invention

It is a well-known fact to oil will operators that upon wells where gas pumps are used, it is necessary to preserve as nearly a perfect vacuum as possible, and that no air should be let into the well at any time when, it can possibly be svoided; consequently whenever the tuhing is drawn from a well, it is the cause of great injury to it, as the stuffing box being then necessarily opened, the sir immediately runke back between the tubing and casing into the well, going into the oil rock and gas venne, and consequently causing the ail and gas to rush back to a great distance. It almost siways takes several days after pumping is resumed for a well to be brought back to its former condution, and oftentimes it takes several weeks, and quite frequently wells have been almost acompletely runsed by the air being thus let in while drawing tables.

Which entirely prevents the in-

gress of mir into cil wells

being drawn.

weeks, and quite frequently wells have been almost completely varied by the air being thus let
in while drawing taking.

The Back Succise Preventive is attached to the
stoffing box, and works in such a way that it completely shurs up the space between the stuffing
box and tubing so effectually that not a particle
of all tain get through at any time while the tubing is being drawn and replaced.

It supplies a want long felt, and is without
question one of the most valuable inventions of
the day to those engaged in the oil-producing
business. No well should be without one, as it
oftentumes saves ten times its cust by once
using. It is manufactured and for sale at the Foundry and
